You asked, we listened. Making fabrication and installation easy!

Continually investing to add value to our customers whilst offering the best all-round performance aluminium products to the UK market, our entire Aluna range provides premium security, luxurious durability, and robust functionality as standard.

Making it easy is a key attribute of the Aluna product family, as is never standing still with regards product design and differentiating product features. Made from marine grade aluminium our Aluna range is specifically designed and manufactured with enhanced corrosion resistance enabling a finished product that not only looks good immediately after installation, but it also continues to perform and retain that luxurious finish for years to come.

With Aluna, the premium aluminium range from Alunet Systems, you can fabricate and install an entire house project – Making It Really Easy!

There are several reasons that Aluna is fast becoming the go-to brand of choice in the UK for luxury aluminium, but here is an overview:

Everything we design and do has our customers at the heart, front, and centre.

Pas24 certified luxury aluminium across all of our Aluna range.

Unrivalled strength and durability. Aluna is strong, durable, lightweight and corrosion resistant to withstand any weather.

Excellent thermal efficiency.

Secure and highly attractive.

We have a vast UK stock holding of our standard colours.

Available in all RAL colours on request.

Super Slim Sash available.

Arguably the best all-round performance, including excellent security, durability and functionality. We can offer you the best aluminium products the market has to offer. Get in touch today to discover the vast opportunities our Aluna family is opening the doors to!

Why choose Aluminium?

Aluminium is extremely durable and more hard-wearing than other materials on the market. You'll be able to enjoy ALUNA marine grade aluminium windows for decades to come due to their high resistance to the elements.

It is also an incredibly strong material, providing a high level of security and impact resistance.

Aluminium windows are among the best insulated on the market, thanks to advanced thermal break technology, which prevents cold transfer.

They require very little maintenance to ensure optimal performance and a fresh aesthetic.
