Custom Glass Integral Venetian Blinds are an advanced tilting and lifting Venetian Blind system encapsulated within the DGU.

Designed specifically for domestic and commercial applications they are the ideal choice for Conservatories, Bi-Fold Doors, offices and many other applications such as internal partitioning. The system is zero maintenance and is operated by an external mechanism attached to the internal face of the Window/Door enabling the owner to regulate their own comfort or privacy.

The Blinds are available in manual (cord or slider), mains powered or solar controlled systems in a range of colours enhancing the energy efficiency of the sealed unit and therefore making substantial savings on heating bills.

The SV Venetian blind system is operated by a magnetic slider, placed on the right or left-hand edge of the glass. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider. The SV venetian blind is suited to all types of window frames. The integrated unit can be fitted into the window frame like standard IGUs

Blind Options: Venetian or Pleated.
Control Options: Sliding Magnet
Cavity: 16mm (Venetian only) or 20mm

All our blind systems are available in a wide range of colours.
Please contact our sales office for further details.

The C system is a magnetic corded system with manual operation (raising and tilting function) for blinds incorporated within insulating glass units. The C System has a cord loop attached to an external magnet which can be positioned either on the left or the right of the header rail, which is secured with a cord tensioner, making it easy to operate by pulling down on the left or right side of the cord to raise and lower the blind or to tilt the slats. The blind can also be operated by Knob or Wand control.

Blind Options: Venetian, Pleated or Roller
Cavity: 20, 22, 27, 29 or 32mm. Operation: Cord, Wand, Knob or External Motor.

All our blind systems are available in a wide range of colours.
Please contact our sales office for further details.

The W Swipe system is a 3 volt battery operated system with an external solar panel. The motorised raising /lowering (and tilting, in venetian models) function is carried out via a touch control device (battery module) that is attached to the window frame or glass surface. The battery module incorporates a radio receiver, which allows individual blinds or groups of blinds to be activated by an optional 99 channel remote control. As each unit has its own battery pack, there is no need for hard wiring leading to an a cost effective install. It is a cost effective motorised blind alternative to the MB system.

Blind Options: Venetian, Pleated

Control Options: Swipe or Remote Control. Cavity: 20, 22, 27, 29 or 32mm

All our blind systems are available in a wide range of colours.

Please contact our sales office for further details.

The MB system is a 24 volt hard wired system. The system is operated via a remote control, push button or our app. Leaving nothing on the outside of the glass, this system gives the ultimate finish. The most common application for the MB system is high end residential projects and the system is ideal for bi folding or sliding doors

Blind Options: Venetian or Pleated

Control Options: Remote Control or BMS System

Cavity: 20, 22, 27, 29 or 32mm

All our blind systems are available in a wide range of colours.

The P System is a manual operated system for venetian blinds incorporated within a 20 or 22-mm cavity. It is designed to perform a tilt-only function of the blinds by means of an external knob that is secured to the window frame: the glass appears completely clear, easy to be clean and free from external devices.

Blind Options: Venetian
Control Options: Plastic or steel anti-ligature knob or key operated hidden knob
Cavity: 20, 22, 24mm

All our blind systems are available in a wide range of colours.
Please contact our sales office for further details.

The pleated blind is a shading system with horizontal pleated fabric, whose performance in terms of sun protection is given by the type of fabric used. The pleated blackout blind provides both privacy and complete blackout properties to prevent the light of the sun's rays from entering the room.

Blind Options: Corded

All our blind systems are available in a wide range of colours.
Please contact our sales office for further details.
