TRIPLE GLAZED PERFORMANCE IN A DOUBLE GLAZED UNIT

Exclusive to Rooftech in the NW

NWROOFTECH

www.nwrooftech.co.uk

Is triple glazing better than double glazing?

Not when it's Custom Glass Ultimate double glazing

The Ultimate 28mm double glazed unit outperforms both standard Low-E double glazing significantly and triple glazing in heat retention, noise reduction and overall efficiency. All of this and at a lower cost than triple glazing.

Now you can achieve in a double glazed unit, the performance of a triple glazed unit without the additional expense

The main benefits of the Custom Glass Ultimate unit

Reduces Heat Loss

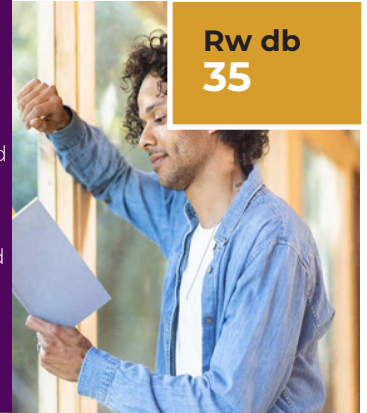

U-Value measures the heat loss through the unit in Winter months. the lower the U-Value, the warmer in Winter the room will be.

**U-Value
1.0**

Improves Noise Reduction

The Ultimate Double Glazed unit offers an improvement in the acoustic rating when compared to a standard Low-E unit or a triple glazed unit making for a quieter environment within the property

**Rw db
35**

Heat Reflection

Solar Factor percentage of the sun's heat able to pass through the unit. the Ultimate double glazed unit reflects the sun's heat away from the unit, therefore reducing heat build-up in the summer months.

53%

Overall Thermal Efficiency

When combining the heat retention in the Winter, cooling properties in summer and noise reduction all year round, the ultimate double glazed unit is 90% better than a standard triple glazed unit.

90%
